

Date:

Wednesday Challenge Form

Group Members: Nick Armen Edgar

Problem Statement: we had to solve some math problems that we make ourselves to make a boat tail

Approach: Nick was working on the math problems while I was making the mold to form the boat tail. Edgar was taking pictures of the Process of making it so we can upload it on our websites.

Solution: The mold worked and it got the job done surprisingly

Lessons Learned: the whole process of making the project was a lot harder than I thought it was.
